i think that this game has a lot of potential, and is really fun to play, it's just really short.. Nice game in the beginning but a few things make it unplayable.

- Animals dying because they are too stupid to walk to the water/food alone.
- Research is set to zero when the responsible person quits the job, even for finished research projects. I tried to raise the salary to keep all employees, but it did not work.

It is impossible to play the game like this.... Absolute Master Piece. This genre tends to feel over saturated. Candy crush did it best and every other company attempted to mimic it. However, this game has surpassed previous limits and ascended into game history. Graphics? AMAZING! Story? AMAZING! Character development? AMAZING! Gameplay? AMAZING! Even the music can bring me to tears it is that polished. Blood, sweat and tears were put into the crafting of this perfection. This game has shook the gaming world like no other game before and I just hope you will also get to experience it too.

10/10 would game again. Best game ever i don't need to write a lot for telling you how awesome this game is :DDDDDDDDDD. My friends and I play Black & White Bushido locally in Big Picture Mode with controllers. We find it to be a fun little indie game.

Unfortunately, it is unlikely that you will be able to find someone to play in online multiplayer anymore. That seems to be the reason for the mixed reviews.

In any case, I definitely recommend the game for local co-op.. Sad really. It feels like one of those B-list Eastern European RPGs (think Risen or Two Worlds) but barely half-finished. One area, very poor optimisation, janky combat, rough graphics, menus from the 90s; the list goes on.

I'd be prepared to give it the benefit of the doubt if it hadn't been 2 full years since the last update. The fact I got the game for 79p says how much the developers now think it's worth. Maybe one day development will start up again and it'll be amazing. However I'll probably be old and uninterested by that time.. I love tower defense games, but this one is not so good. For some reason, when i start the game, it does not fill my screen, (unlike every other game I've ever played). And the graphics are horrible. Game-play was ok, but the graphics and screen issues wore me down quick.. it's a good game

nice game, slow paced music is nasty get head phones to jam out lol all in all nice game. The submarine control interface is poorly designed and makes the game nearly unplayable. Further, there is a glitch that causes you to warp through the walls when you are diving outside the submarine. When in Dive mode, C4 sometimes doesn't trigger and if you have to move diagonally in an enclosed space, you can get hung up on the terrain. Way too much trouble and not fun. Refund requested.. Was an amazing game with a great story. BUT SO ANNOYING. Only 4 episodes with completely different stories. Its ur decision to choose to buy this game.. Great puzzle game. It is a good game, but, there is an issue where atmosphere gets low, with means people dislike it and a large number of reductions happen, please nerf the reductions (IE low atmosphere score = -100% low income families is the current, make it something like -50%, or make it so that wallpapers, flooring and some decor can increase the atmosphere.)

Overall, this game has the potential to be one of the best in the market (I saw gameplay of it from a twitch streamer, which then inspired me to play). Even in the early access state I have accumulated 3.5hrs in my first day, and counting, and I hope to continue playing it for the foreseeable future.

I understand the game is in early access, so when these improvements have been put out I will change my response (Either by commenting or editing this one, i don't know as this is the first time I am reviewing a game on steam!

Thanks for a good game so far, Alain!. it has fleeb from rick and morty 10 out of 10 unless you count fleeb that are pink fluffy balls that a purple monster eats the ♥♥♥♥ out of than yes it counts. Good Game ... so fun and i love it. Yep well , i don't really like this but man i really thought i was gonna like this game , cool graphics , going through all of hell . I was like hell yeah gimme that . But then once in game you'll learn this is senile grandpa simulator with extra steps . I guess i didn't really payed attention to that ' amazing story ' when you'll spend 99% of your time chasing small light spheres or the fact that you are freakin as slow a an 98 year old grandpa at the liquor store . I just payed attention to the fact that this game really is for a chosen audience and that it will certainly not satisfy everyone (me the first) so be prepared to refund . Well made and everything but just really boring .. First off I have to give a tip of the hat to the dev team, they made a great game and in my opinion this is a must have for your VR collection.

I am running this on a 1080 graphics card on ultra settings and I havent had any motion sickness problems.

Dev team is very responsive, I reported a problem via the discussion forums and within minutes a dev was responding to my issue and less than 24 hours they said a fix is already in the works. So Kudos for that!

Gameplay wise this has a lot of replayability, I played 1 multi player match and had a ton of fun! I can't recommend this game enough. If you are thinking of buying it DO IT! You won't regret it!
