Tumour necrosis factor-related apoptosis-inducing ligand (TRAIL) is a member of the TNF superfamily that has been shown to be involved in apoptotic signalling. TRAIL has been shown to be effective as an anti-tumour and anti-viral agent, but its potential as a therapeutic agent for rheumatoid arthritis has yet to be proven. Recently, it has been shown that tumour necrosis factor-alpha (TNF-alpha) is involved in the pathogenesis of systemic lupus erythematosus (SLE) and that the Fas/Fas ligand (FasL) pathway is an important mechanism for the self-limiting lupus glomerulonephritis in lupus-prone mice. We hypothesize that TRAIL could have similar beneficial effects in SLE by limiting excessive apoptosis and cell proliferation. This hypothesis is put forward in this review article.Heinrich Berghaus Heinrich

Berghaus (6 March 1818 – 20 January 1896) was a German geographer. Life Heinrich Berghaus was born in Starnberg, Kingdom of Bavaria. He studied with Johann Georg von Hahn at the University of Bonn, where he also received his doctorate in 1842. In 1846 he began working as a public servant in the city of Saarbrücken. In 1848 he became associate professor at the Mining Academy in Saarbrücken. In 1855 he transferred to the Mining Academy in Berlin, where he remained until his death. Professional work In 1852 he compiled a geographical dictionary (nearly 900 pages), which was not only used as a guide
